

ORTLIEB ATRACK

FULL-FEATURED OUTDOOR BACKPACK AND TRAVEL DUFFLE FOR A NEW WAY OF TRAVELLING

Inspired by defining a new backpack category, ORTLIEB designed the new Atrack: the Active Travel Backpack is waterproof according to standards IP67, and is easy to use for all types of travel and outdoor recreation, while always ensuring 100% dry gear. Atrack is an innovative backpack in response to the trend of short trips and minimalism. Designed with modern, active travel and minimalist style in mind, the innovative Atrack is the first of its kind. It defines the Active Travel genre and raises the bar for backpack design in general.

The uniquely positioned TIZIP zipper inside the Atrack's back provides a wide opening offering unobstructed access to all of your gear, no matter how crowded your pack is. Digging through the pack, opening various buckles or straps to find buried items therefore becomes history. Another bonus: the carrying system stays dry and clean during packing and unpacking, because the rucksack component of the Atrack lays face down on its front. The zipper's unusual and strategic position is another advantage: it prevents any unauthorized access while the pack is on your back.

Atrack is both, a full-featured outdoor backpack and a travel duffel – offering maximum flexibility with just one piece of luggage. The modular system and numerous accessories allow individual adjustments and quick, sport-specific modification of the pack along your trip – to the outdoors or the city. Accessories and compressions straps can be fixed to numerous daisy chains.

Shoulder straps with stepless length adjustment (25 L/ 35 L: S-L; 45 L: M-XL) allow individual adaption of the pack to various body sizes. A breathable carrying system and a padded waist strap with integrated pockets ensure ideal distribution of weight and optimal ventilation.

Four zippered inner pockets and internal compression straps guarantee clean organisation for easy packing and unpacking. Atrack is PVC free and sustainably produced in Germany.
