

ORTLIEB SADDLE-BAG TWO HIGH VISIBILITY

WATERPROOF SADDLE-BAG WITH INTERWOVEN REFLECTIVE YARN

The waterproof Saddle-Bag Two High Visibility ensures that cyclists are highly visible in the dark and in bad weather conditions. The entire fabric is interwoven with a reflective yarn turning the bag into one large reflector when hit by headlights. In addition, the bag features a highly luminous reflector.

With a volume of 4.1 L the Saddle-Bag offers enough space for a spare tube, repair kit, rain jacket, and food. Thus it is particularly suited for both mountain and road biking being a true alternative to a backpack, or ideal as supplementary bag for touring with lots of luggage. A convenient side effect: Saddle-Bag Two High Visibility functions at the same time as protection against water and mud, just like fenders.

The roll closure is secured to the sides with buckles. The mounting set is available as accessory for a second bike. Saddle-Bag Two High Visibility is one of many high viz products from Ortlieb. It is made of PVC-free, sturdy reflective Cordura fabric, and sustainably produced in Germany.

OPTIONAL ACCESSORIES

Seat mounting for saddlebag (article code E97)

Strap system (article code F96E) for fixing to comfort or spring saddles
